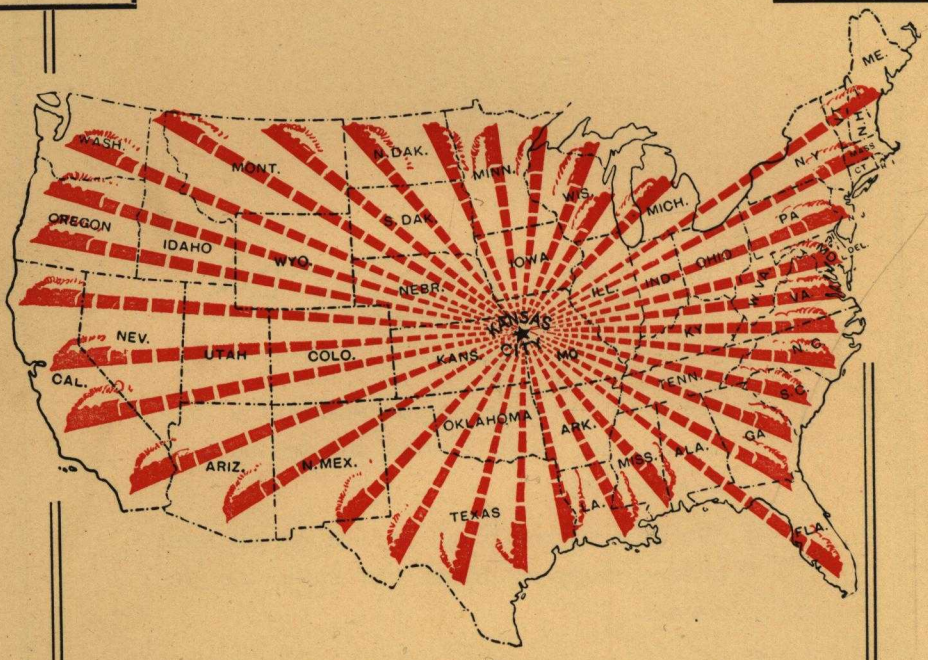
Daniel Diehl



KANSAS CITY IS THE HEART OF AMERICA. A glance at the map at the top of the page shows our geographical location. This is the reason we are able to give the efficient service which we do. Kansas City is the second largest railroad center in the United States and has thirty-two distinct railroad lines, which radiate in every direction. On an average, 1,500 cars of freight enter and leave Kansas City daily.

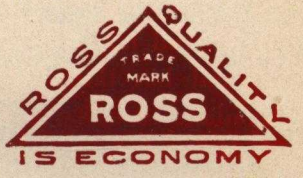
In shipping to distant points we route our freight in through package cars, which are sealed in Kansas City and are not opened until they reach their destination. This gives our customers prompt service.

CATALOG "C"

ROSS MANUFACTURING CO.

MANUFACTURERS
AND JOBBERS OF

High Grade Plumbers' Specialties



1225 Lydia Avenue
KANSAS CITY, MISSOURI

CHAS. E. BROWN PRINTING CO., KANSAS CITY

To Our Customers:

We take pleasure in presenting our Catalog C, in which you will find many new items.

We solicit your mail order business and assure you of prompt and efficient service. All mail orders are shipped the same day as received.

In order to give our customers prompt service, we urgently request when ordering goods they specify the quantities in which we have our goods boxed. This saves much time in filling orders and eliminates mistakes which are liable to occur when it is necessary for us to break packages.

Our goods are packed and boxed in quantities as you will find them listed in this catalog. These boxes are also neatly labeled for your convenience in placing them on your shelves. This is another reason why you should order material as it is listed and boxed.

You will find a supply of mail order blanks in the back of catalog.

We thank our many customers for their past favors and hope for a continuation of same.

Yours truly,

ROSS MANUFACTURING COMPANY.

Specialty Cases

For Rubber Goods and Specialties of All Kinds.

This case contains 24 drawers, as follows:

8 drawers 3x2x10
6 drawers 4x3x10
6 drawers 4x4x10
4 drawers 6x6x10

Size: 25½ in. wide, 23 in. high, 11¼ in. deep.

Made only in solid oak, golden oak finish.

Weight, 75 pounds.

Each **$52.00**

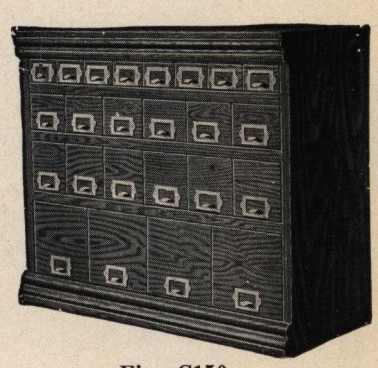

Fig. C150

These cases are made of oak with galvanized iron drawers which make them rust and dust proof.

Prices Are F. O. B. Factory.

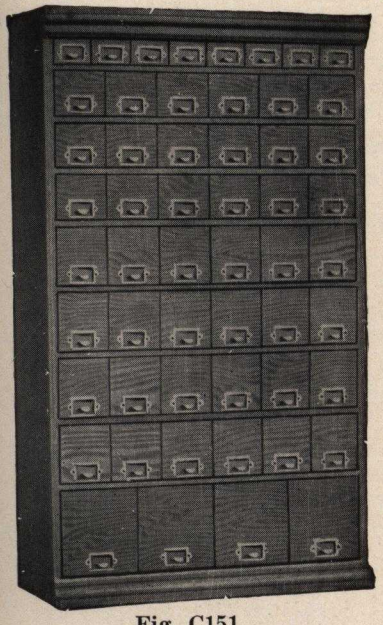

Fig. C151

This case contains 54 drawers, as follows:

8 drawers 3x2x10
18 drawers 4x3x10
24 drawers 4x4x10
4 drawers 6x6x10

A liberal supply of divisions included to divide drawers into compartments.

Each drawer is fitted with combination pulls and card frames and is made with a depression on side (which is enameled) so that cost and selling price may be written thereon.

Case has a steel back so that contents will keep in same condition as if they were in their original packages.

Construction is such that it will last a life-time. It takes very little room and is the largest value ever offered.

Size: 25½ in. wide, 43¼ in. high, 11¼ in. deep.

Made only in solid oak, golden oak finish.

Weight, 150 pounds.

Each **$92.00**

Plumbers' Auto Repair Kit

For your Repair Wagon or Automobile **Just What you Have Been Waiting For**

We originated the first Plumbers' Repair Kit placed on the market and now we originate this larger, more complete and up-to-date kit.

Fig. C153

Copyright, 1918

Ross Manufacturing Co. Kansas City, Missouri

ROSS QUALITY IS ECONOMY

Fig. C153

Copyright, 1918

The material shown above is neatly packed in the kit, which has 57 compartments. The box is made of heavy Wood with Iron-bound corners, and will last for years. It is also fitted with heavy Iron handles, securely fastened on each end. The hinges and hasp are also of a heavy, substantial design. The trays are made of Sheet Metal, and set in the box flush with the top, so when the lid is closed there is no danger of the contents becoming mixed. This is something you cannot afford to be without.

Dimensions: Width, 11½ inches; Height, 10½ inches; Length, 36 inches.

Complete as shown, with contents.....**Each $150.00**

This Handsome Oak Cabinet Free

Fig. C155

On an order for Twelve Dozen Ross Tank Bulbs of assorted sizes we will pack the bulbs in individual boxes and furnish this Oak Cabinet free of charge.

This will keep your stock of Tank Bulbs in good condition and prevent the bulbs from getting out of shape, dirty and shopworn. The individual boxes we know will appeal to you, as they will keep the bulbs clean, so when your plumber goes to a private residence to install one the owner will not think you are installing an old second-hand bulb.

More Tank Bulbs are being used every day and an assortment of twelve dozen bulbs will give you a small quantity of the different sizes.

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Ten Reasons Why Ross Tank Bulbs are Superior to the Old Style Tank Bulbs

1. They are manufactured from a better grade of rubber than ever before used in a Tank Bulb.

2. They seat slower and allow the tank to empty entirely on account of being lighter in weight. A good rubber compound is lighter in weight than a poor quality, cheap compound.

3. The Bulb is literally one piece of rubber, completely and entirely formed by hydraulic pressure, making it free from defects found in joined bulbs. Forming the bulb under hydraulic pressure, with no hand operations, makes possible walls of uniform structure.

4. They are given a dense cure under hydraulic pressure, which prevents them from being porous and swelling. This is a common fault with the old style bulbs as they are only partially cured and are porous, which causes them to absorb water, swell out of shape and hang on the overflow tube of the flush valve.

5. Ribbed Top, which is another patented feature, prevents bulb from collapsing. This is a common fault with the old style bulbs.

6. They are uniform in thickness, which is only made possible by this patented method of curing.

7. Square slotted brass spuds are used in our bulbs as you will note from cut on opposite page. These spuds are firmly imbedded in the rubber by a dense cure and the square, slotted feature of the spuds prevents them from turning or being pulled out of the bulbs.

8. Quality is not only a matter of choice with us but an absolute necessity, as the large core which forms the bulb must be removed from the comparatively small opening in the bottom after the bulb has been formed and cured. It is very evident that an inferior grade of rubber could not be used in a bulb of this character.

9. Ross Tank Bulbs are individual in appearance which enables the plumber to obtain a better resale price, thereby eliminating cheap competition.

10. Boxed in individual cartons with resale price printed thereon.

Ross Fuller Balls

Eight Sizes

With Our Firm Name Molded on Every Ball. This Is Our Guarantee and Your Protection.

Our Fuller Balls are made from a new, special, high grade compound which was thoroughly tested by chemists and also given severe boiling tests by ourselves before offering them to our customers. We recommend our Fuller Balls and guarantee them for use on either hot or cold water. We stock only one grade, which is the very best.

The compound used in our Fuller Balls is firm but pliable, which prevents the balls from splitting when being placed on the stem. This also prevents them from becoming hard and brittle while being carried in stock. Age does not affect them, but age will cause a cheap Fuller Ball to become hard and then split when being installed.

We call your attention to another important feature—the shape of our Fuller Balls; the blunt end prevents the ball from being forced too far into the faucet seat, thereby retarding the flow of water.

Ross Bibb Washers

Nine Sizes.

Our Bibb Washers are made from the same high grade compound as the Ross Fuller Balls, but they are cured longer, making them firmer and tougher. This prevents them from cracking and chipping when extreme pressure is used in closing a faucet. We guarantee our Bibb Washers for either hot or cold water and recommend them to plumbers who desire high grade washers. Bibb Washers give better and longer service when not trimmed to fit bibb seats. We have mold equipment which produces nine sizes, and by purchasing some of the intermediate sizes it makes trimming unnecessary.

Ten Special Features of the Ross Ball Cock

1. A patented article which we sell exclusively to the master plumbers who desire a high grade Ball Cock for repair work.
2. Made of High Grade Red Brass, well machined and tested under 150 pounds water pressure after being assembled.
3. All working parts and thumb screws are made of cast Red Brass—no stamped parts used.
4. Has compound leverage and is guaranteed to work on high or low pressure.
5. Quiet in operation and can be regulated for any water pressure by patented adjustment screw.
6. Retard Cap on plunger prevents water splashing over tank.
7. Plunger is fitted with heavy brass seat cap, which holds pure gum washer.
8. Large outlet which fills tank quickly and quietly.
9. Shank is extra long and is reamed out for ⅜-inch supply pipe.
10. Can be installed in less time than any other Ball Cock, by removing collar from old supply pipe, thereby making a slip-joint connection. This does away with carrying an assortment of bushings and saves many trips back to the shop.

Ross Basin Connections

White Nickel.

Fittings are made of Red Brass, heavy pattern, and are free from sand holes. The tubing is of heavy gauge, annealed and seamless. The joint is made up tight on lathe, using pipe-joint cement and guaranteed not to leak. Our Basin Connections may cost a little more than some cheap connections, but they are well worth the slight difference in price. Furnished complete with beveled slip-joint washers and brass friction rings.

Approximate weights—No. 1 Flange, 18 ounces; No. 2 Flange, 13 ounces; No. 3 Flange, 8 ounces.

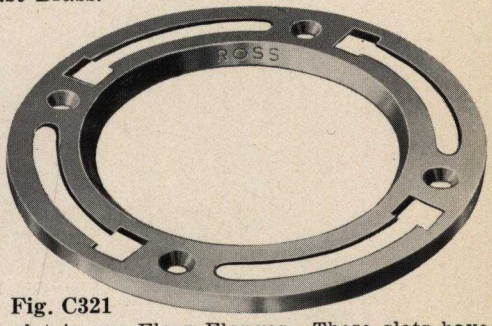

Fig. C321

We call your attention to the bolt slot in our Floor Flanges. These slots have a ridge underneath which prevent the bolts from turning while being tightened up. Also note large openings for bolt heads through which the bolts can be inserted after flange is in place. If a bolt should break while being tightened up the head can be removed and another bolt inserted without taking up the flange. This feature insures quite a saving in time.

Ross Boiler Repair

Patented.

The Ross Boiler Repair is made of lead and brass. The lead shell expands as the brass thumb-screw is turned after being installed in hole in range boiler. The cuts shown below are actual size, and give a good idea as to how this Repair is installed.

Instructions for Operation—Punch or drill a $\frac{5}{16}$-inch hole in the range boiler at the leak; then insert Ross Boiler Repair. Hold lug on side of shell to keep it from turning while tightening up brass thumb-screw with pliers.

You will find this the most satisfactory and the easiest installed boiler repair on the market.

2 Extra Long	Basin Cocks	**5.00**
3 Extra Long	Bath Cocks	**5.00**

Our Fuller Eccentrics are made expressly for repair work, and when our Stems and Eccentrics are used in conjunction we guarantee a perfect fit, thereby saving considerable time and worry in filing and reaming, trying to make an Eccentric fit a Stem for which it is not intended.

We have made our illustrations actual size and we call our customers' attention to the width and design of the shoulders on our Eccentrics. These are made extra large, which prevents them from pulling through stuffing-box nut on a faucet which is slightly worn. Also note difference in size of the spindles on the different Eccentrics and the extra long lengths of same.

Assortments of Brass Screws and Nuts

Pipe Cutter Repairs

ROSS THIN BLADE CUTTER WHEELS

Made from the finest grade of tool steel obtainable for the purpose and are hardened and tempered in oil. The Blades on Ross Wheels are less than one-sixteenth inch thick and absolutely straight from the hub to the cutting edge. They cut pipe with one-third the power and time required with the old-style wheels. With the old-style wheels two-thirds of the operating power is wasted.

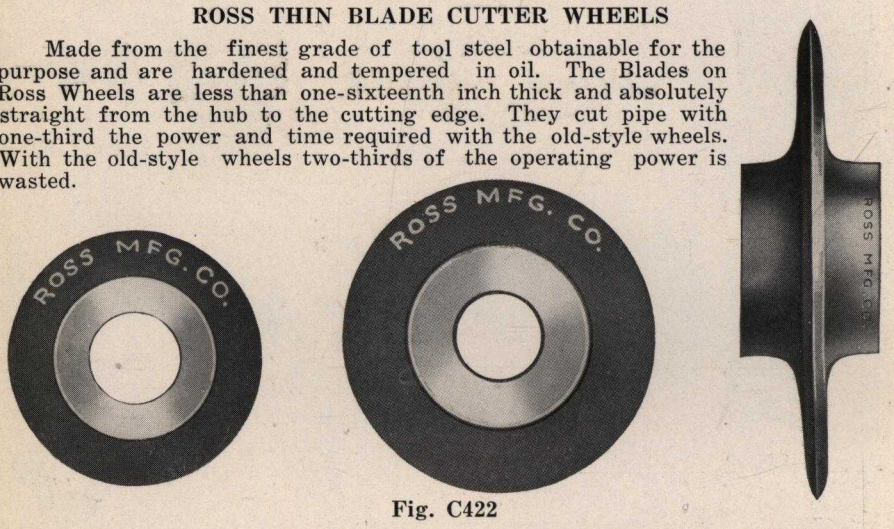

Fig. C422

WHEELS.

9/64-inch	10.80
7/32-inch	10.80
¼-inch	12.00
5/16-inch	14.40
⅜-inch	18.00

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Waste Pipe Cleaners

FOR OPENING UP AND REMOVING STOPPAGES IN WASTE PIPES

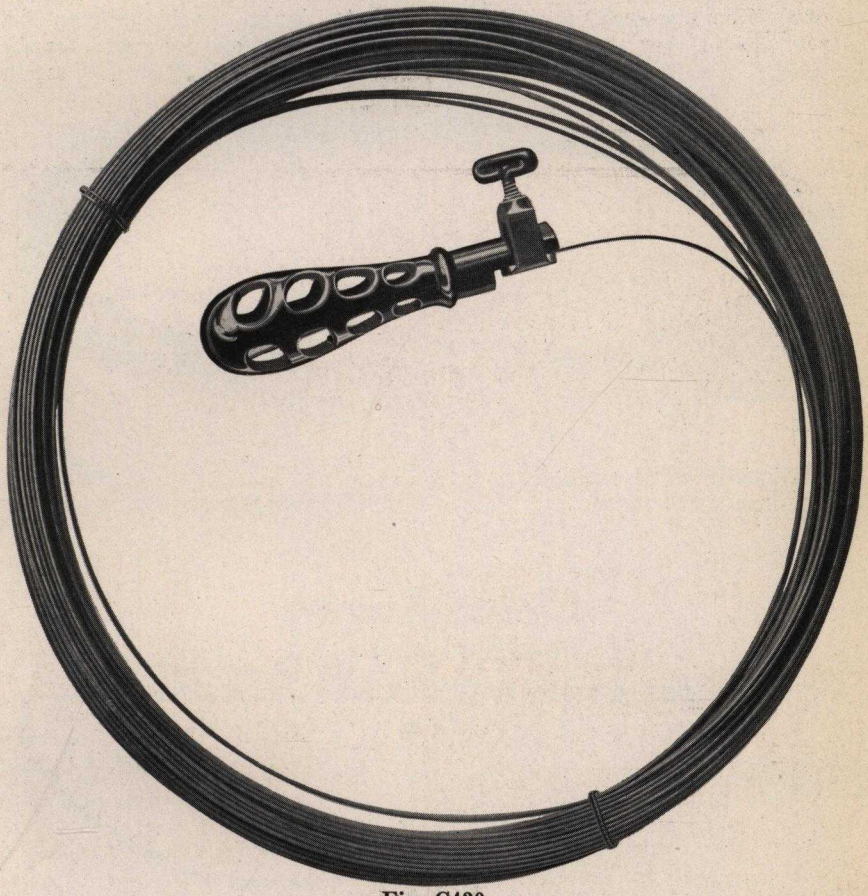

Fig. C430

These cleaners are made from a specially prepared tempered spring steel by the crucible process, which means great strength, toughness and flexibility. The flat shape makes these cleaners more flexible, which is necessary for long runs of waste pipe. The special tempering prevents cleaners from curling after constant use. They are stiff enough for rodding purposes and flexible enough for turning at bends and elbows.

Sizes	Each	Sizes	Each
⅛-inch x 25 feet	$3.00	$\frac{3}{16}$-inch x 100 feet	$ 7.70
⅛-inch x 50 feet	4.50	¼-inch x 25 feet	4.00
⅛-inch x 100 feet	6.50	¼-inch x 50 feet	6.50
$\frac{3}{16}$-inch x 25 feet	3.50	¼-inch x 100 feet	10.10
$\frac{3}{16}$-inch x 50 feet	5.50	Extra Iron Handles	.50

The above prices include one handle with each cleaner.

Sewer Rods

Made from a specially prepared tempered steel by the crucible process. These rods are flexible, but stiff enough for rodding purposes, and we guarantee them not to kink or buckle. Sold only as illustrated. They are not fitted with handles.

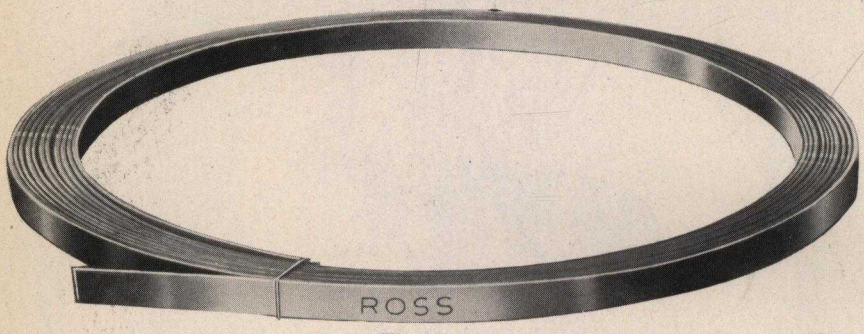

Fig. C431

Size, ¾-inch x 50 feet	Each $16.00
Size, ¾-inch x 100 feet	Each 30.00

Closet Augers

Brass Tube—Steel Spring.

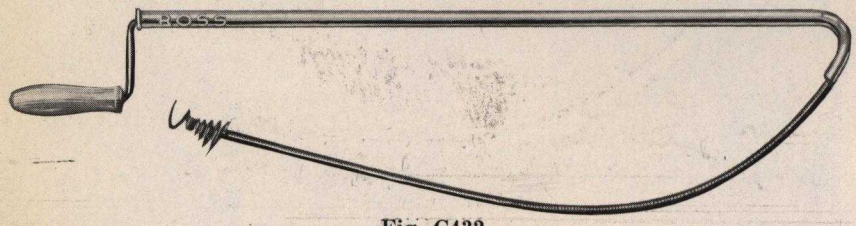

Fig. C432

Size, 3 feet	Each $ 7.50
Size, 6 feet	Each 10.00

REPAIR PARTS

Spring, 3 feet	$2.00
Spring, 6 feet	4.00
Wire Cone Guard	.50
Brass End with Hook	1.00

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Flexible Waste Pipe Cleaners

For opening up and removing stoppages from Waste Pipes, Closet Bowls, etc.

Springs are ⅜ inch in diameter. They are made of the best steel wire and are strong and flexible. Fitted with Adjustable Iron Handles with Set Screws.

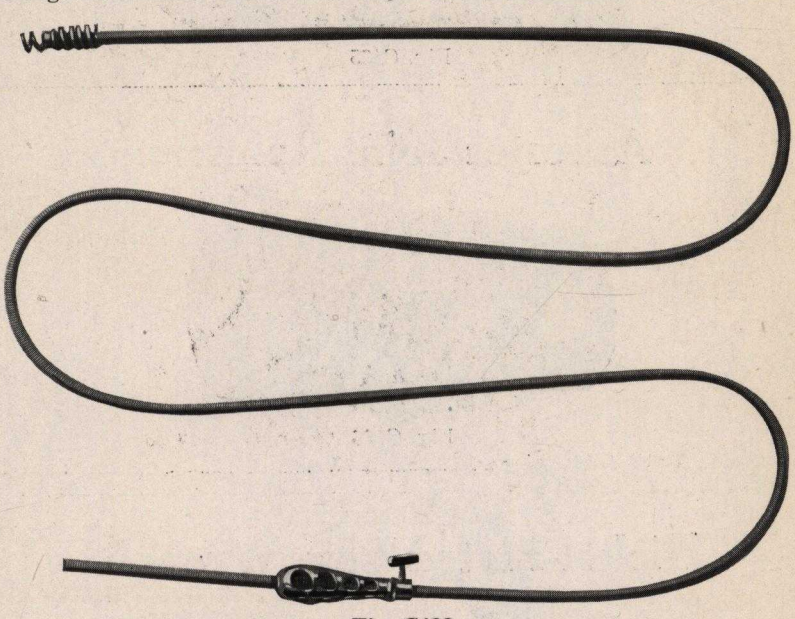

Fig. C433

Length, 15 feet	Each	$6.50
Length, 25 feet	Each	9.40

Bending Springs

Fig. C434

Size, 1¼-inch	Each	$1.50
Size, 1½-inch	Each	1.80
Size, 2 -inch	Each	2.40

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Wood Handles

For Soldering Coppers and Files.

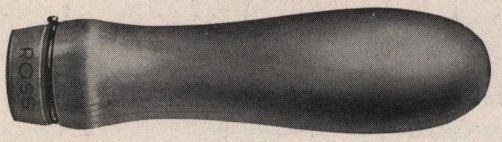

Fig. C435

Per Dozen.....$2.00

Asbestos Joint Runners

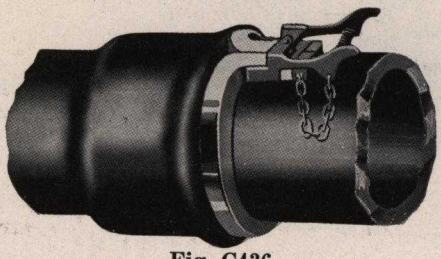

Fig. C436

No. 1—For 2, 3 and 4-inch pipe.....Each $5.60
No. 2—For 4, 5 and 6-inch pipe.....Each 6.00

Nickel-Plated Pipe Wrench

Fig. C437

12-inch—Takes pipe ¼ to 2 inches.....Each $4.00

Strap for Nickel-Plated Pipe Wrench

Fig. C438

12-inch.....Each $1.00

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Swedging Tools

No. 2

FOR SWEDGING BRASS TUBING

Tempered Steel.

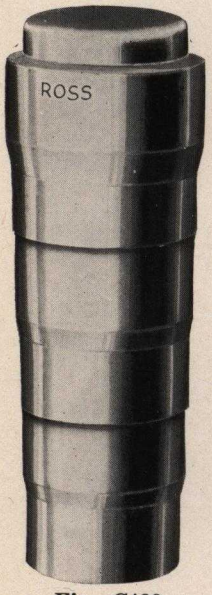

Fig. C439

No. 3

Fig. C440

	Each
No. 1 Complete—1¼-in., 1⅜-in., 1½-in., and 2-in.	$12.00

3½x3½	inches	9.00	17.00
4 x4	inches	12.00	24.00

Tap Borer

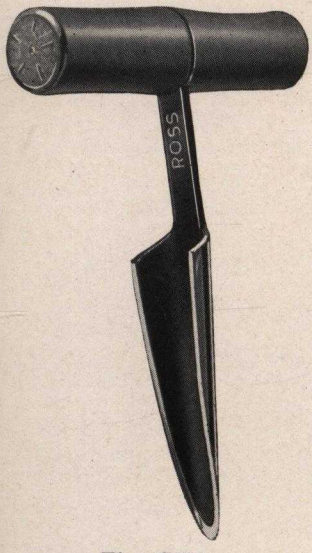

Fig. C451

Per Dozen.....$13.70

Basin Plug Wrench

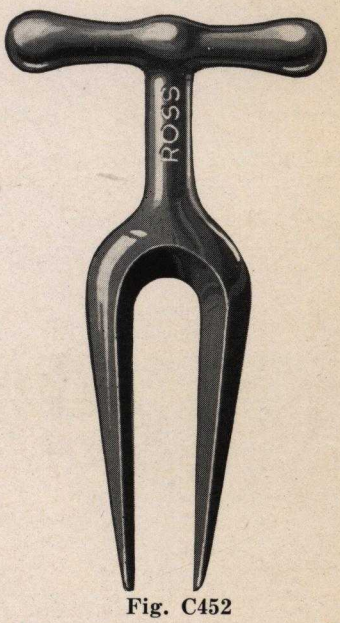

Fig. C452

Per Dozen.....$10.00

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Steel Bending Pin

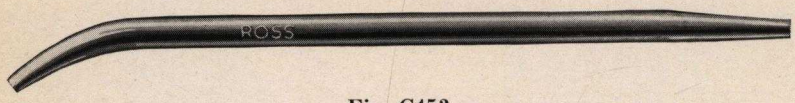

Fig. C453

Per Dozen.....$8.00

Soldering Coppers

Fig. C454

Weight per Pair, 1 -pound	Each	$0.90
Weight per Pair, 1½-pound	Each	1.40
Weight per Pair, 2 -pound	Each	1.80
Weight per Pair, 3 -pound	Each	2.70

Circle Saws

Similar to the old-style Shell or Stove Drill, but a better and less expensive tool, as the cutting blades can be replaced for a few cents.

The Drill makes the center—a perfect hole every time. This is a very handy tool for Plumbers or Steam Fitters.

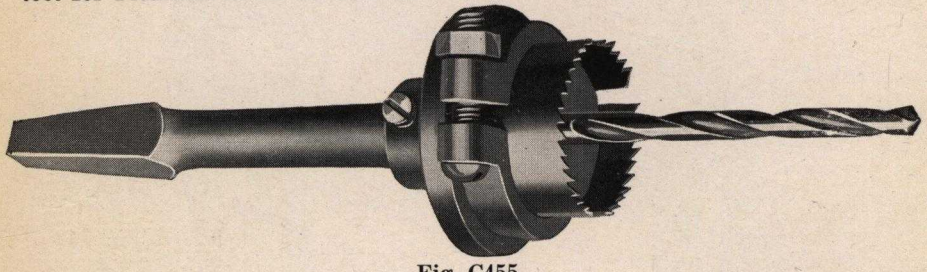

Fig. C455

Size, 1 -inch	Each	$5.20
Size, 1¼-inch	Each	6.00
Extra Blades, either size	Each	.70

Quantities Listed Are Standard Packages. Broken Packages Cause Errors and Delay Shipments.

Ross Valve Stem Packing

This packing is constructed especially for use on valve stems, slip-joint connections, etc. It is made from a carefully selected long and strong fibre of the finest quality of asbestos. Each strand is thoroughly saturated with a special quality of self-lubricating compound before being made up. It will not stick or harden under extreme heat or pressure, and is soft and pliable. The strands are twisted so they can be unwound if necessary.

Fig. C456

Put up on one-pound metal spools.

⅛-inch	Per Pound	**$3.20**
$\frac{3}{16}$-inch	Per Pound	**3.20**

Plumbers' Candles

Fig. C457
For tinning, soldering and light.

Per Box, 20 lbs., 100 Candles **$12.80**

Asbestos Wicking

Fig. C458

¼ or ½-Pound Balls..... Per Pound **$1.50**

Candle Wicking

Extra Fine.

Fig. C459

Per Dozen Balls..... **$3.60**
Per Bag, 40 Balls..... **8.00**
